Projects

E-Commerce Manual Testing QA Project | Jira, Excel

GitHub: <https://github.com/ayushi-jain-14/E-Commerce-Manual-Testing-QA.git>

- Performed manual functional testing of an E-Commerce web application covering user registration, login, product search, product details, shopping cart, wishlist, checkout, and payment workflows.
- Designed and executed test scenarios and test cases, documented test results in Excel, and prepared test summary and defect reports. Designed a responsive and user-friendly interface for better accessibility.
- Identified and reported defects in Jira with clear steps to reproduce, expected and actual results, and defect tracking details.

BloodLink Hub | HTML, CSS, JavaScript, MySQL

GitHub: <https://github.com/ayushi-jain-14/BloodLinkHub.git>

- Created a blood donation management platform with donor, receiver, and admin modules.
- Managed the admin dashboard for handling blood requests, users, appointments, and reports.
- Designed a responsive and user-friendly interface for better accessibility.
